

## What is Efficient Elements for presentations all about?

Efficient Elements for presentations is an Add-In for Microsoft PowerPoint that helps you create more professional presentations in less time.

On top of that, it can be customized to support the consistent use of your corporate design.

## How exactly does it help me?

- Are you tired of building **agenda slides** manually?  
Create and update even complex agenda slides in a few seconds using the **Agenda Wizard**.
- Do you have to reinvent the wheel every time you need a **standard element** like a process chain, 3-column design, or puzzle?  
Insert such elements with a single click, our **Slize Wizard** offers a large element library and is fully customizable!
- Are you constantly **searching** your hard drive for **charts** you created some time ago?  
Use **My Elements** to manage your own charts or elements!
- Do you find it difficult to **align objects**?  
Use our **Efficiency Tools** to easily and precisely align objects!

## Does it pay off?

Absolutely.

In an efficiency study, 104 Efficient Elements users at Siemens have estimated an average time saving of more than 2 hours per week.

More than 80% of the participants rated Efficient Elements as highly useful and do not want to miss it. Here are some of their comments:

- "It is not only time saving but also strong improvement of quality of slides"
- "I would die without this tool in the future"

## How does it work with our corporate design?

Efficient Elements for presentations can be fully customized to any corporate design.

Our standard customization package adjusts color, font settings, and position and size of all elements in the Slide Wizard and the Agenda Wizard to your corporate design for a flat fee of 199 EUR (excl. VAT).

Please contact us at [info@efficient-elements.com](mailto:info@efficient-elements.com) for further individual customization requests.
